FALL PLANTING SPECIAL

SAVE AMERICA'S NUT HERITAGE

PLAN TO PLANT A NUT TREE

THOMAS BLACK WALNUT IN NURSERY ROW, BEARING TWO
MATURE NUTS FIVE MONTHS FROM GRAFTING
ORDER NOW FOR FALL PLANTING

JOHN W. HERSHEY

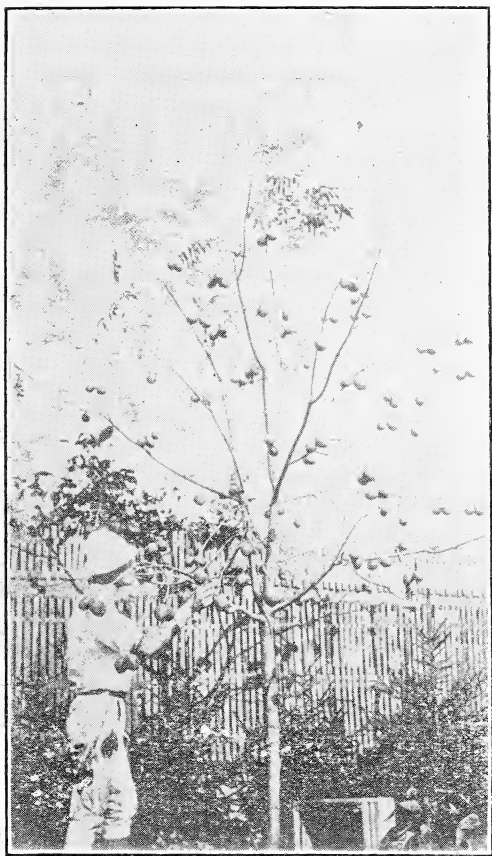

NUT TREE NURSERIES
DOWNINGTOWN, PA.

3-yr THOMAS BLACK WALNUT BEARING 16 NUTS. GROWN BY
S. H. GRAHAM, ITHICA, N.Y.

We wholesale our thin-shelled Thomas Black Walnuts for \$4.00 per bu., or sell the kernels for \$1.00 per lb. Amelia Reihl. Godfrey, Ill.

Bakers and confectioners are creating a strong demand for Nuts. Are you intending to get some of the profits while others keep on raising crops that are over produced already?

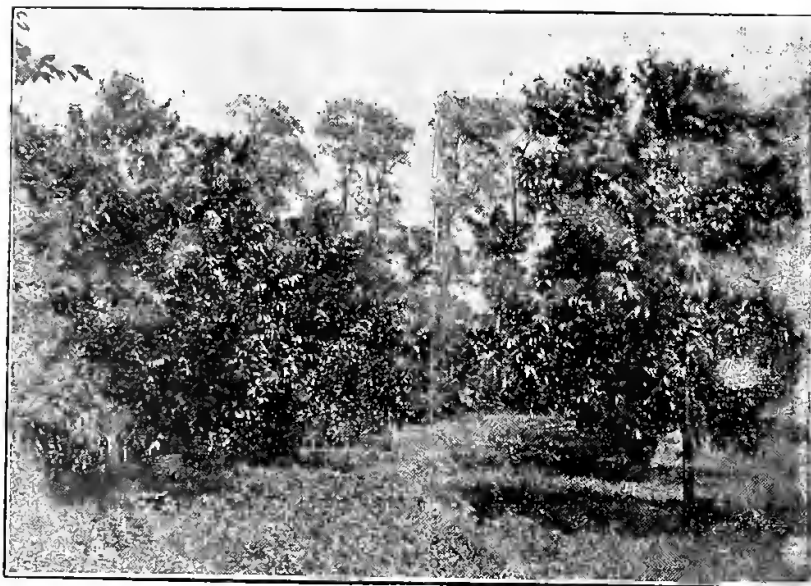

6-yr OHIO BLACK WALNUT 124 NUTS, OWNED BY S. H. GRAHAM, ITHICA, N. Y.

What would you do if 100 acres of Grafted Black Walnuts 10 years old would be given you? I would retire from law and become a wealthy man.

T. P. Littlepage.

Do you care to become a millionaire, young man? Plant 500 acres of good Black Walnuts.

Charles W. Miller, Nut Candy Maker.

BEHOLD THIS NOBLE PECAN GROVE, A PENNSYLVANIA DUTCHMAN'S TREASURE TROVE, 7 YEARS OLD AND BEARING IN LANCASTER COUNTY, PA.

Only the foolish think Pecans don't do well in the Central West. Trees in Indiana bear as much as 600 lbs. No attention is given them except flailing the trees in the fall. Why buy Pecan acreage in the South when better Pecans can be grown for less trouble in the North?

Can a more sad fact be told than the cutting of these acres of diamonds (Pecan groves) to grow corn? Will the land owners of the Central States

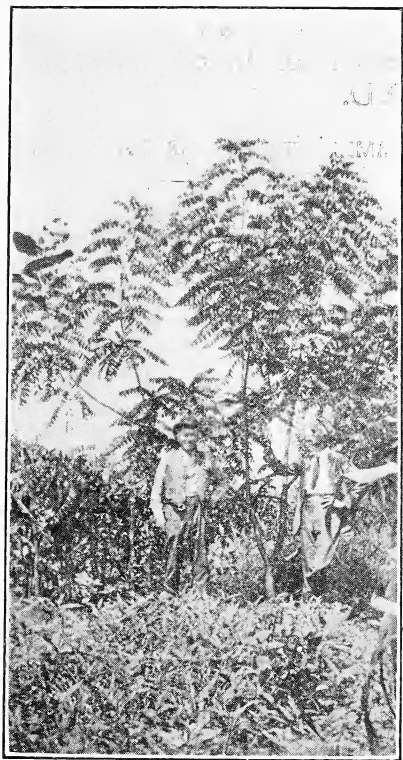

respond to the call to save their heritage of Nut trees by again planting the Pecan of the Grafted variety?

Use only our Grafted Rapid Growing Nut trees that start early in life, the habit of bearing regularly heavy crops of thin shelled nuts. These superior Walnuts and Pecans cannot be compared to the common seedling.

5-yr. WEALTHY APPLE

Five years ago a far sighted man set out this grove of Apple and Nut trees. Would they thrive and make a profit? Many "doubting Thomases" smiled. These trees set 25 feet apart on rich bottom land make a good test. Today, at five years of age we see the Thomas Black Walnut much larger than the apple in size. Some of the apple

5-YR THOMAS BLACK WALNUT IN SETTING OF NUTS AND APPLES, WESTTOWN, PA.

trees are larger than shown above but none are near as large as the nut trees. Only an apple here and there was seen, whereas the nuts all bore nicely, some trees having as many as 125 nuts. Compare the difference in size and bearing habit, notice how the corn is growing under the trees.

Can a good thing come of nut tree planting?
Look and see!
